EASY ORDERING TIPS:

Provide dimensions of openings, how many openings on each skirt & approximate exterior diameter of skirt.

How to easily measure the length of straps needed:

Simply walk heel-to-toe alongside the skirt and count the steps to determine the approximate diameter in feet.

Multiply that number times 3.5 to determine each strap length needed. (example: 34 steps X 3.5 = 119 ft for each strap.)

Have multiple openings on a tower? Easily hang as many covers as you need on the same straps to secure them all!
